

### Test 1 :

- Marie: do a simulation on how long it takes to save 2000€ to buy a car.

I easily guessed where to go to save money but once I am on the appropriate screen, no functionalities are available to test things. But on the principle I did not find any problems except for the fact that I can't return back to the home screen. I do not understand why this is here :

- Pedro: Learn about investments through the AI chatbot.

The simulation part does not make any sense and does not provide the appropriate or accurate information to the user. Click on trends and it goes to money management ? Loans and program part good. Change color of the add debt button when you confirm that you really want to add debt. Also, when a user confirms something that will trigger any action on his account even simulation, having a confirm bubble is always nice. Invest and add fund buttons go to the same screen (add fund).

- Élodie: Set a limit on evening outs of 200€.

Maybe change the name evening outs.

Other : Icons need to be "homogenized".

### Test 2:

- Marie: do a simulation on how long it takes to save 2000€ to buy a car.

The page to do the task is easy to find because of the name of the button "simulasave", inside the page, there is the need of having a clear button to trigger the resulting date of savings.

- Pedro: Learn about investments through the AI chatbot.

The page is also easy to find.

The "help" name of the button is not really clear of what it does, the button needs to be called "chatbot"/

- Élodie: Set a limit on evening outs of 200€.

loud and clear

### Test 3:

- Marie: do a simulation on how long it takes to save 2000€ to buy a car.

Simulasave still has the I can save every month

Vaults button confusing

- Pedro: Learn about investments through the AI chatbot.

Still don't understand trends

- Élodie: Set a limit on evening outs of 200€.

Caption the expenses pie

How to set current limits?

How to add money to money management? Or is it just a bank account?

- General:

What's Settings?

Font size a bit small in some cases.

Some tabs are very different.
